## *The Celtic complexion*

New York based image consultant Samantha von Sperling has some top color advice for Irish skin:

“Lucky for the Irish, this season there is a lot of khaki green and purple, which are great colors for the classic Irish complexion,” von Sperling said.

“There are a lot of burgundies, burnt oranges and burnt caramels in the Paris collections, which look great on glowing, freckly skin. I would avoid bright or blue-based reds, but burgundy, burnt reds, rusty and blood colors work well. Nars has a yellow-based red lipstick called Red Lizard, which is perfect for freckly skin with

red hair. I've put that on an Irish beauty and it can be beautiful.”
